

High Performance Design Training

Planning new facilities?

Fishing for information on sustainable design and LEED?

Reel in proven strategies for getting better buildings!

Who should attend:

State and local government officials, architects, engineers and building industry professionals involved in decision-making, design, and construction for new facilities.

Full day professional training:

- Learn from the best: Presenter Greg Franta, FAIA is a principal with Rocky Mountain Institute and an expert in creating high performance buildings and applying the LEED rating system.
- Find about the benefits of high performance design and hear about LEED projects in Colorado.
- Get an in-depth look at the LEED-NC rating system, how to use it and what's new in version 2.2.
- Hear about new rating systems for Homes, Neighborhoods and Existing Buildings.
- This can be your first step toward becoming a LEED Accredited Professional.
- New in 2006! Preview the free online guide packed with over 100 pages of insights and photos:
Using LEED-NC in Colorado: Tips, Resources and Examples.
